PROFESSIONAL OBJECTIVE

Aspiring Engineering student with experience working on academic, frontend-focused web development projects using tools such as React.js, Figma, etc., and other full-stack projects. I am currently working on expanding my knowledge on AI/ML and data analysis. I have a strong interest in learning from real-world projects and applying my skills to them, and I hope to achieve this through your company.

EDUCATION

Atria Institute of Technology, Bangalore — B.E. in CSE

Nov 2022 - Current

Currently pursuing my **Bachelors of Engineering in Computer Science and Engineering** with **8.7 CGPA**.

Relevant Courses: Machine Learning, Artificial Intelligence, Natural Language Processing, etc.

St. Francis Xavier Girls' High School, Bangalore — 10th and Higher Secondary School.

July 2020 - July 2022

Completed my High School (**ICSE - 10th Standard**) and High Secondary Education (**ISC**) with 82% and 67% respectively.

SKILLS

Programming: C, C++, Python (Basic), HTML, CSS.

Data & ML Tools: NumPy, Pandas, Scikit-learn, Data cleaning, visualisation, and exploratory analysis.

Web, DB & Frameworks: MySQL, React.js, Jupyter Notebook.

Other: Prompt engineering, Content Writing, Experience working with GenAI development tools.

WORK EXPERIENCE

Assisto Technologies

January 2026 - Present

Full Stack Developer Intern

- Developed and designed interactive frontend and fully functional backend for product websites.
- Worked on improving existing product softwares and applications.

Genzi.ai

July 2025 - December 2025

Content Creation and Frontend Design Intern

- Developed and designed responsive frontend interfaces for product websites.
- Directed digital content and blog management, and designed marketing materials (articles, newsletters, brochures, etc.).

PROJECTS

AI-Powered Braille Translation System (Final Year Project)

August 2025 - December 2025

- Developed a full-stack, accessibility-focused translation system leveraging **NLP** and **AI** to accurately convert Standard English text into Braille, and vice-versa, using **Python** and **Typescript** as main programming languages.
- The project's research paper was accepted and presented at the **4th International Conference on Advances in Science, Engineering & Technology (ICASET-2025)**, validating its academic relevance.

Online Voting System using Blockchain

November 2024 - January 2025

- Developed a secure, transparent online voting system utilizing blockchain technology to ensure immutable record-keeping and voter authentication, and **published a research paper** on the system's architecture through the **Grenze International Journal of Engineering and Technology (June Issue)** and presented at the **Second International Conference on Emerging Technologies in Science & Engineering (ICETSE – 2025)**.

CERTIFICATIONS

AI/ML using Python

August 2025 - January 2026.

TNS India Foundation

Certified in AIML, Python, Collaboration, Teamwork, Communication
